

## **MASCIP Conference 2021**

### **Managing Covid risks**

There are no legal requirements relating to Covid however we are very mindful that some of our delegates will have vulnerabilities and many of our delegates are healthcare professionals working directly with vulnerable people. This is an overview of the planned arrangements we'll have in place for the conference. We ask for your respect and cooperation. Please be mindful and respectful of others at all times.

This information aims to provide reassurance and guidance to all delegates, speakers and exhibitors.

#### **Cleaning**

The conference venue still has increased cleaning regimes in place in all areas, with wipes and hand sanitiser in all areas. We will have masks available too if needed.

#### **Ventilation**

In meeting rooms, air conditioning is now using and circulating fresh air not recycled air, in line with government guidelines. We will be opening doors for a time inbetween sessions for additional ventilation: you might like to bring extra layers in case the room temperature drops for a time as a result.

#### **Space**

We will have extra seats in the conference room to support distancing between delegates. We will reduce the furniture in the area by the coffee machines for breaks. We will stagger breaks and lunch sittings to support distancing. Please be mindful of others and keep distance where possible.

#### **Masks**

We strongly recommend mask wearing wherever possible (in the conference room and in other areas when not eating/drinking). We will provide masks if you need one.

#### **Your health**

Do not come if you have any symptoms of coronavirus.

Please do a lateral flow test within 24 hours before arrival and only travel to conference if this is negative

#### **CHECKLIST**

- No covid symptoms
- Negative lateral flow test within 24h before arrival
- Bring mask and extra clothing layers
- Keep distance where possible
