

SCI RESEARCH NEEDS YOU!

Are you interested in helping researchers find out how spinal cord stimulation could improve the quality of life for people with SCI?

We are recruiting adults aged 16 and above with a motor-complete SCI (AIS A or B) between C5 – T6 for over 1-year.

What's involved?

Testing at the **University of Birmingham** includes **high-intensity supervised exercise trials** and assessments of your health **using non-invasive electrical stimulation.**

Enrolment lasts **approx. 19 weeks**, including **11 assessment visits** and **16 exercise intervention sessions.**

Receive compensation for up to **£40 per visit** and **£200 for completing the exercise intervention!**
